OUR CHANCELLOR
HER HOLINESS SRI MATA AMRITANANDAMAYI DEVI

OUR
GUIDING LIGHT AND INSPIRATION

“Children should be taught the art of relaxation, how to be at ease. If they don’t feel relaxed, how can they learn? Without relaxation, no real learning is possible. This is the first lesson that clearly needs to be understood. It is very important that parents & teachers understand this before they ask the children to do something”.

-AMMA

AMRITA CENTRE FOR ALLIED HEALTH SCIENCES

The healthcare system in the country is unable to meet the needs of the population because of many factors, the most prominent one being the acute shortage of trained healthcare service providers. Availability of human resources at all levels of the healthcare system is integral in moving towards the larger goal of Universal Health Coverage for India.

Allied health professionals include individuals involved with the delivery of health or related services, with expertise in therapeutic, diagnostic, curative, preventive and/or rehabilitative interventions. They work in interdisciplinary health teams including physicians, nurses and public health officials to promote, protect, treat and/ or manage a person('s) physical, mental, social, emotional, environmental health and holistic wellbeing.

In the past decade, a fundamental shift has occurred in healthcare delivery, largely due to advances in science and technology. It is now more evident than at any time in the past, that health care delivery is no longer a prerogative of physicians and nurses. It is more of a team effort, drawing expertise of both clinicians and non-clinicians. These professionals or health-service providers have been collectively termed as Allied Health Professionals (AHPs). AHPs are key to health-sector reforms in India, especially given the shortage of doctors and nurses in semi-urban and rural areas of the country. There is a huge dearth of trained technologists/technicians in the system; advancement in technology in recent time demands trained individuals who could provide reliable results in conjunction with patient safety.

Allied health professionals are defined and interpreted differently across the globe. They have a critical role and are the support pillars of the healthcare team. There are many professionals who are trained to handle specific health problems and provide services in their area of expertise through comprehensive assessment, diagnosis and/or treatment to promote recovery and improve quality of life. Amrita Centre for Allied Health Sciences has a distinguished history of teaching Allied Health professionals the latest, most advanced medical and surgical practices. Amrita, in fact, has been training Allied health professionals from throughout the country for over 20 years.

PROGRAMS OFFERED

Under-graduate courses

- Bachelor of Anaesthesia & Operation Theatre Technology (B. AOTT)
- B.Sc. Cardiac Perfusion Technology (CPT)
- B.Sc. Cardio Vascular Technology (CVT)
- Bachelor of Nutrition & Dietetics (Honours)
- Bachelor of Dialysis Therapy Technology (B.DTT)
- B.Sc. Echocardiography Technology (ECT)
- Bachelor of Emergency Medical Technologist (Paramedics) – B.EMT
- Bachelor of Medical Laboratory Science (B.MLS)
- Bachelor of Medical Radiology and Imaging Technology (B. MRIT)
- Bachelor of Radiation Therapy Technology (B.RTT)
- B.Sc. Neuro Electro Physiology (NEP)
- Bachelor of Respiratory Therapy (B. RT)
- Bachelor of Optometry (B. Optom)
- Bachelor of Physician Associate (B.PA)

IMPORTANT

The admission activities to Allied Health Science is through the Admission Office presided by the Director, Directorate of Admission, Amrita Healthcare Campus, Faridabad

SL. No:	Course	Duration of the Course	Eligibility Conditions
