

Steps for using IEEE PDF eXpress and submitting a camera-ready paper

1. Conference ID/Code

- Conference ID is 66809X
- You'll need this to register in PDF eXpress.

2. Create an Account in PDF eXpress

- Go to: <https://ieee-pdf-express.org>
- Click *Create Account*.
- Enter the conference ID, your email, and create a password.
- Confirm account creation and follow verification steps.

3. Log In to PDF eXpress

- Use your email, password, and conference ID to access your dashboard.

4. Upload Your Paper (Word/LaTeX/PDF)

- If you have a **Word/LaTeX file**: upload it, and PDF eXpress will generate a compliant PDF.
- If you already have a **PDF**: upload it for compliance checking.

5. Verification Process

- The system runs compatibility checks (fonts embedded, margins, file size, etc.).
- If there are errors, you'll get a report and may need to fix issues and re-upload.

6. Receive Notification

- When successful, you'll receive a confirmation email stating the file passed PDF compliance.

7. Download Verified PDF

- Log back in, go to "Files Ready" section, and download the IEEE Xplore-compliant PDF.
- **Do not rename the downloaded file from the PDF eXpress.**
- This is the **final version** you must submit to the conference portal (CMT), or else you may be asked to resubmit again and again.
