AMRITA SCHOOL OF BUSINESS, COIMBATORE

Able Conference and Workshop 2026

Transforming Operations: AI, Analytics in Sustainable Value Chains

Who We Are

Amrita School of Business at Coimbatore Campus provides broad-based and specialized business education, preparing individuals to face the ever-growing challenges in the business environment with confidence. The school holds the prestigious, internationally recognized AACSB ranking (Association to Advance Collegiate Schools of Business). Our faculty resources include globally recognized academicians, distinguished Alumni and Expert Adjunct professor of Practice. We have a vast and diverse corporate and research experience in the areas of HR, Marketing, Finance, Operations, General Management and Analytics. At ASB, we aim to deliver sustainable and ethical solutions through developing technological, social and inter-personal skill sets.

Dr. Santanu Mandal **Mr. Dhivakar Raviram**

Professor, ASB
7731081495

Deputy Manager, ASB
9943117777 | 9952432604

TWO DAY PROGRAM

DAY 1: ABLE Conference

DAY 2: ABLE Workshop

AI-ENABLED OPERATIONS AND LOGISTICS

- AI for demand sensing, planning and exception management
- End-to-end visibility, control towers and digital decision-making
- Automation, digital twins and responsible AI

RESILIENT SUPPLY CHAINS

- Risk sensing, scenario planning and supplier diversification
- Traceability and agility in complex value networks
- Managing disruption beyond lowest-cost sourcing

GREEN OPERATIONS

- Low-carbon freight, warehousing and fulfilment
- Multimodal logistics and emissions measurement
- Circularity, resource efficiency and sustainable value chains

INDUSTRY-ACADEMIA COLLABORATION

- Industry perspectives on emerging operations careers
- Live business challenges and solution-oriented discussions
- Applied research, MDPs and project opportunities

OBJECTIVE

To bring together industry leaders, academics and students to explore how Indian organisations can build intelligent, resilient and sustainable operations. ABLE will translate emerging operational challenges into practical priorities for business action, talent development and collaborative innovation.

TAKEAWAYS

- Practical insights on AI-enabled operations and logistics
- Approaches to build visible, responsive and resilient supply chains
- Actionable ideas for greener operations and lower-carbon logistics
- Exposure to industry expectations and future-ready career capabilities
- Networking and opportunities for live projects, research and professional development
